

Jefferson County General Health District

2020 Annual Report

The 2020 Team

All divisions of the Jefferson County General Health District are located at 500 Market Street, 6th Floor, Steubenville, Ohio.

Board Members:

R. Terry Bell, President
Patrick Macedonia, MD, Vice President
Clark J. Crago
Jean-Philippe Rigaud

Dr. Frank L. Petrola, MD, served on the Board of the Health in 2020 until his passing on November 10, 2020. Dr. Petrola was a dedicated member of the Board for more than 27 years, serving as President for many of those years.

Administrative Division:

Nicole Balakos, Health Commissioner (1/1/2020-9/10/2020)

- Position was vacant 9/11/2020-12/31/2020

Mark A. Kissinger, DO, Medical Director
Jodi Norris, Director of Administration and Finance
Kelly Wilson, Fiscal, Grants & PIO Officer/ Accreditation Coordinator
Tamika Jones, Accreditation Coordinator (resigned eff. 11/6/2020)
Sheryl Suppa, Registrar, Asst. Fiscal Officer
Jane Klug, Administrative Assistant/Vital Statistics
Linda Agresta, Environmental Clerk/Vital Statistics

Environmental Division

Marc Maragos, Registered Sanitarian, Director
Michael Ceraolo, Sanitarian-in-training
Carla Gampolo, Registered Sanitarian
Jack McGuire, Registered Sanitarian
Rick Stead, Public Health Emergency Preparedness (PHEP)

Clinical Division

Nursing

Hannah Piko, RN, Director
Alyssa Patrick, RN
Tina Piergallini, RN
Kim Slivka, RN

WIC

Stephanie Chester, RN, Director
Izzie Biasi, Health Professional
Jackie Dinofrio, RN
Kim Walters, WIC Clerk
Crystal Wickham, Breastfeeding Peer Helper

2020 – The Year that was COVID-19

In January, the Ohio Department of Health (ODH) began setting up weekly calls with local health departments preparing for a possible outbreak of this highly contagious and dangerous virus called 2019-nCoV. ODH in tandem with the Centers for Disease Control had been closely monitoring developments. These early calls began with tracing what was happening in Wuhan, China and how they were going to begin screening travelers and what to expect with symptoms of those infected with 2019-nCoV. Locally, we began planning, preparing and working with ODH as new developments emerged.

On March 5th, local health departments were invited to meet with Governor DeWine and Dr. Amy Acton in Columbus for an informational meeting. They provided a debriefing of the first few cases identified in Ohio, and what actions local health departments should take when a person under investigation (PUI) is identified in our jurisdiction. We were warned at this time that the spread was going to continue and it would begin rapidly increasing unless drastic measure were taken, and we found this to be true not only for Ohio but across the world.

On March 26th, our county had its first positive case. On page 22, you will find a chart of the confirmed COVID-19 cases by month. March through December was nine months of contact tracing and mitigation strategies in the community. Interviews with local new stations were held to educate the public on mask wearing and hand hygiene, the best way to prevent the spread of the disease, and how to protect those at greatest risk of contracting the disease.

Our hospitalization numbers soared in November and December, as well as our death count. The county was certainly feeling the ramifications of this deadly virus. We encouraged the community regularly to avoid gatherings, not to have parties, or events. In December, we saw our highest number of positive cases – 2012 in one month. But, in December we also administered our very first Moderna COVID19 vaccine, and subsequently 172 more doses before the end of the year.

In mid-December, the U.S. Food and Drug Administration (FDA) authorized the emergency use of mRNA-1273, Moderna’s vaccine against COVID-19 in individuals 18 years of age or older. Delivery began immediately after the authorization. We received our first shipment of the Moderna vaccine on December 22nd and our department put their plan in to action. In accordance with the Governor’s phased rollout approach, we vaccinated healthcare workers and EMS responders beginning December 23rd. Before 2020 ended, 172 doses of the Moderna vaccine had been given.

2020 was a year of challenges, changes and loss. Our strength and resilience was tested. The JCGHD worked hard for all residents of this county, always with the best of intentions. We were saddened and grieved with the families and friends of the 53 residents of this county who lost their lives to COVID-19. In addition, many lost their jobs, and some even lost their businesses. There was much hardship and pain, but even in the worst of times, it is possible

to feel gratitude. While gratitude doesn't free us from life's difficulties, it can help us through the hard times by reminding us what is most important. As we look forward to 2021, much work remains to be done. Under the direction of our new leader, we will continue to service the people of Jefferson County with the same dedication and commitment to good health.

Key Dates of Events in Ohio During Covid-19 Pandemic in 2020

Administrative - Finance Division

2020 Beginning Balance: \$551,266

2020 Ending Balance: \$870,358

Environmental Division

The Environmental Division works to advance policies and programs to reduce chemical and other environmental exposures in the air, water, soil, and food to protect people and provide communities with healthier environments.

The environmental team is comprised of three registered sanitarians and one sanitarian-in-training. The work to ensure that restaurants and retail food establishments meet local and state guidelines. In addition, they regular residential and small flow sewage treatment systems, tattoo and body piercing facilities, solid waste landfills, swimming pools, and campgrounds.

The environmental division also monitors schools, inspects public nuisances such as illegal sewage discharges, trash accumulations, rodent and other animal and insect disease vectors, and other potential public health hazards. See Appendix A for Environmental activities by political subdivision.

SEWAGE PROGRAM

2020 Sewage Information: Permits and Providers

A total of 62 septic system Installation Permits were issued in 2020.

Township	# of Permits	Township	# of Permits
Cross Creek	3	Springfield	4
Island Creek	14	Steubenville	2
Knox	8	Warren	5
Mt. Pleasant	5	Wayne	5
Salem	10	Wells	3
Saline	3	Total	62

A total of 51 septic system Permits to Operate were issued in 2020

Township	# of Permits	Township	# of Permits
Cross Creek	2	Smithfield	1
Island Creek	13	Springfield	3
Knox	7	Steubenville	1
Mt. Pleasant	5	Warren	4
Salem	9	Wayne	1
Saline	1	Wells	4
Total			51

SEMI-PUBLIC SEWAGE TREATMENT SYSTEMS

A total of 65 Semi-Public Sewage Treatment Systems were registered in 2020. These systems require annual inspection and all were completed in 2020.

PRIVATE WATER SYSTEMS

Registered Sanitarians and Sanitarians-in-Training from the Jefferson County General Health District inspect the construction of private water systems and collect water samples to ensure that water being consumed is free of bacterial contamination and therefore is safe to drink.

The Jefferson County General Health District is responsible for the following water inspection/sample collection activities within the boundaries of Jefferson County:

- Point of Sale program: In Jefferson County, any time a home is sold having a well, the system must be inspected prior to the closing of the sale. This is generally referred to as the “Point of Sale Program”.
- New well construction/installation.
- Existing wells.

2020 Water Information: Installations

A total of 23 Private Water Systems were installed in 2020.

Location	Number Of Private Water Systems Installed
Brush Creek Township	2
Cross Creek	2
Knox Creek Township	1
Mt. Pleasant Township	3
Ross Township	1
Salem Township	5
Saline	3
Smithfield Township	1
Springfield Township	2
Warren Township	1
Wayne	1
Wells	1
Total	23

93 water samples were taken to be submitted for bacterial analysis.

FOOD PROGRAM

The Food Protection Program works to ensure the safety of food prepared, served and sold throughout Jefferson County through inspections, enforcement and education. The food program year runs from March 1st through the last day of February. The food program has two branches of regulatory bodies that provide oversight. The Ohio Department of Health oversees food service operations and the Ohio Department of Agriculture oversees retail food establishments. The inspections help to provide residents with safe food that is served at restaurants, retail food establishments, mobile food operations, and temporary food events located in our county.

This year has been unique with Covid-19 being in the forefront of all that occurred. The Environmental Division was responsible for conducting inspections of facilities that were to be closed due to mandates, mask and social distancing infractions, and assisting the department with other Covid-19 tasks. Many food operations were closed for a period of time this past year due to the Orders issued by Governor DeWine and/or the Ohio Department of Health. Food Service Operations put in long hours fabricating their facilities to meet Covid-19 mandates. We were able to complete all of the additional workload and continue to respond to food complaints, conduct inspections and maintain a safe, healthy environment within our food program.

Inspection Type	# of Permits
Standard	287
Process Reviews/Critical Control Point	53
Mobile	37
Temporary	1
Vending	17

Golden Plate Award

In an effort to recognize our leading restaurants who work hard every day to meet the requirements of sanitation, safe food handling and exhibit best practices of foodservice operations, we instituted the Jefferson County General Health District “Golden Plate Award” beginning January 1, 2020 calendar year. In order to qualify, a restaurant must have been in operation for a minimum of two years and have had an exemplary record of inspections in the previous two years prior to application. Additionally, a FSO (Food Service Operation) must at all times in that time period, demonstrate that they maintained staffing of certified foodservice managers to cover the operational hours; cannot have had any foodborne illnesses associated with the establishment; and cannot have any confirmed consumer complaints.

In 2020, the following two restaurants received awards:

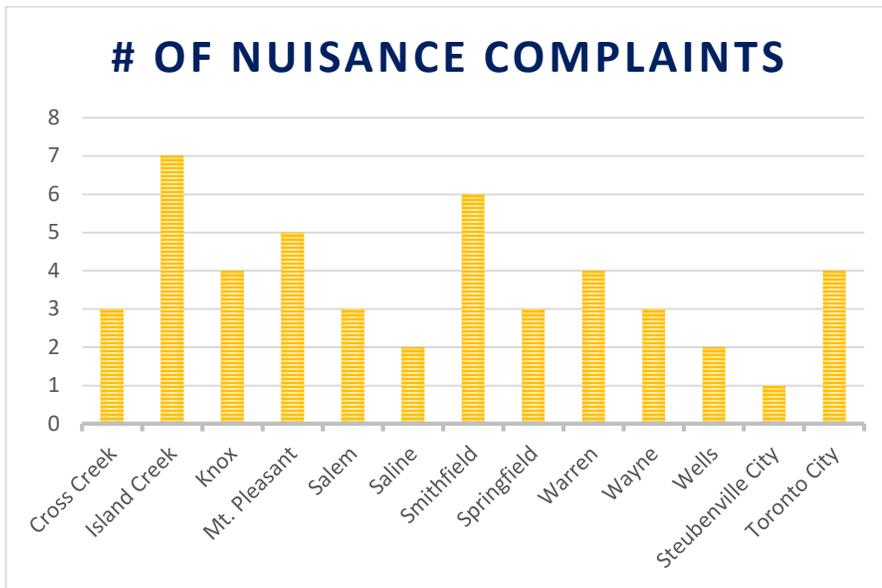

The Farm Restaurant
 1247 OH-150
 Adena, OH

Murrays Restaurant
 498 Cadiz Road
 Wintersville, OH

PUBLIC HEALTH NUISANCE INVESTIGATIONS

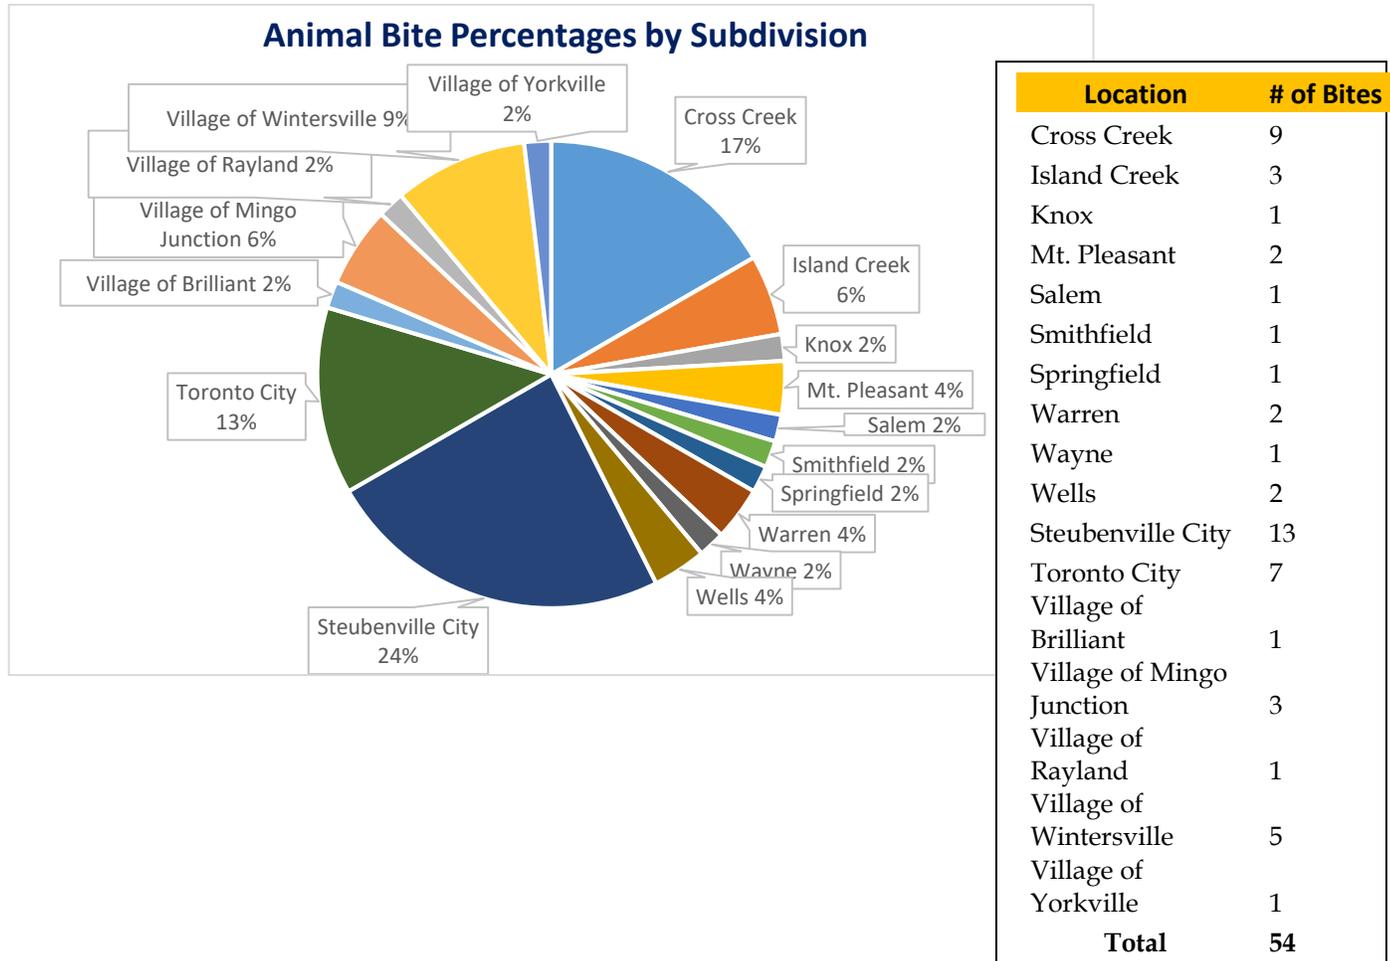

A total of 47 public health nuisance investigations were conducted in 2020. The following chart shows a breakdown of the complaints.

Location	# of Nuisance Complaints
Cross Creek	3
Island Creek	7
Knox	4
Mt. Pleasant	5
Salem	3
Saline	2
Smithfield	6
Springfield	3
Warren	4
Wayne	3
Wells	2
Steubenville City	1
Toronto City	4
	47

REPORTED ANIMAL BITE EVENTS

A total of 54 reported animal bite events occurred in 2020. Forty-nine (49) events involved dogs, and 5 events involved cats.

SOLID WASTE PROGRAM

One of the most well-known areas of our Environmental Division is our Solid Waste Program. The Solid Waste program is an optional program of local health departments. We are on the Ohio Environmental Protection Agency's solid waste approved list of health departments. As such, we partner with the Environmental Protection Agency (EPA) to provide local operational enforcement of the EPA regulations. In 2020, we conducted the following inspections: 12 quarterly inspections, 36 focused inspections, and 44 odor patrols. All quarterly inspections were completed for CD&D (Crossridge), Hollow Rock, Cardinal, and Steubenville City Landfill. The following had one (1) inspection each: Trinity Auto Clave, Bedway Landfill (closed), Stratton Landfill (closed), and Total Lawn (Compost Facility).

WIC DIVISION

2020 was a challenging year for WIC. Due to the pandemic, in-person visits were suspended mid-March. The staff continued to do what they've always done, just in a different manner.

Assessments were completed over the phone and nutrition education completed through the use of paper handouts. Client card loads required participants to physically come into the building, so wires had to be run to allow for minimal contact card loading in the hallway. Phone lactation consultations were utilized as much as possible. In-person lactation assessments continued on an as needed basis with strict sanitation protocols in place.

During National Nutrition Month we focused our education on whole grains with the theme "Eat Right Bite by Bite" and gave out supporting incentives, such as reusable baggies to take your own whole grains snacks with you rather than purchasing unhealthy options at school or work, and strainers.

Dig, Plant, Grow

The Dig, Plant Grow event was suspended due to the pandemic, but the department did distribute packs with peat pots, seed and soil to our participants. These packs included plant growing tips and fresh vegetable nutrition information.

Farmer's Market Program

In the summer of 2020, WIC distributed farm market vouchers to pregnant and breastfeeding WIC clients and to WIC families with children in the program. Each participant that chose to receive the vouchers got four (4) coupons worth \$5 each to use at local WIC-approved farmers market. These were distributed with a children's Farmer's Market book, tips for storing fruits and vegetable, a tote bag and guide for in season Ohio grown fruits and vegetables. 684 coupons were issued. Total of distributed coupons was \$3,420 with 30.1% (208 coupons) redeemed.

Breastfeeding Awareness Month

During Breastfeeding Awareness Month (August), we visited our local pediatricians and obstetricians in a socially distanced way and provided breastfeeding reference books, flyers for distribution to patients needed lactation assistance, laminated lactation assistance cards for the doctors' use and WIC outreach brochures. All were well received. While we could not have our usual breastfeeding luncheon, we recognized our breastfeeding mothers thru social media posts and provided breastfeeding products to them including nursing bras, washable breast pads, milk storage bags, nursing covers, cooler bags and a cute breastfeeding survival kit.

WIC Team from L to R Jackie DiNofrio, Kim Walters, Stephanie Chester, Crystal Wickham and Izzie Biasi

Reverse Trunk or Treat

During October, we partnered with Family Recovery to provide nutrition education and WIC outreach materials for Reverse Trunk or Treat. WIC provided 700 treat bags containing education on healthy kid snacks, dental health information, a toothbrush, coloring book, crayons, mini hand sanitizer and a Halloween printed face mask. These were distributed by Family Recovery Staff at various housing complexes throughout the county. The children came to a central location in their neighborhood and received their treats.

Snacks with Santa

The pandemic prevented us from having our annual Snacks with Santa event. Instead, the staff created a Christmas breakfast at home kit that was distributed to participants during the month of December. The kit contained a sheet of recipes created locally using WIC foods, a cookie cutter for cutting toast into shapes, a counting game, ornament kit and a fun Christmas print mask. As we look forward to 2021, we hope to improve our collaboration with pediatricians, obstetricians, and local food banks, as well as increase our breastfeeding duration rates.

Vital Statistics

The Jefferson County General Health District registers all births and deaths occurring within its geographical boundaries. Deaths among younger residents of the district are often from accidents and suicides. Middle age deaths are attributed to heart attacks and cancers.

Death certificates are available only for persons that were pronounced deceased within the Jefferson County General Health District. The health department does have statewide access to electronic birth certificates. Through this program, we can issue a birth certificate as long as the person was born in Ohio. Both birth and death certificates can be purchased online through VitalCheck.com.

2020 Birth Statistics

In 2020, there were 335 live births at the Trinity Health System Birthing Center in Steubenville, while ten (10) babies were born at home.

Five Year Home Birth Totals

Year	2016	2017	2018	2019	2020
Female	3	5	4	6	6
Male	2	2	5	6	4
Total Births	5	7	9	12	10

2020 Birth Certificate Issuance

The health department has statewide access to electronic birth certificates. Through this program we can issue a birth certificate as long as the person was born in Ohio. Both birth and death certificates can be purchased on-line through VitalChek.com.

- ✓ 2,219 Birth Certificate copies issued
 - Of this number, 341 certificates were issued through VitalChek
- ✓ 2,145 Birth Certificate copies issued were born in Steubenville, Ohio

Due to statewide issuance, a number of copies were issued for births outside of the Jefferson County General Health District.

Child Mortality Review

The Child Mortality Review Board met on March 23, 2020 and reviewed six (6) cases. One (1) case from 2018 was reviewed because the cause of death wasn't entered at the time of review in 2019.

Nursing Division

Vaccine for Children

The VFC Program saw an 83.25% decrease in cases this year due to COVID-19 restrictions and students not being in school. Many families pushed back regular scheduled appointments and got behind on their vaccination schedule. We did complete 140 VFC vaccines in 2020. We are hopeful to reach all children who need caught up on vaccines in 2021. Our strong partnership with schools in our district will help to ensure all students have the necessary vaccines to be in school. We continue to utilize ImpactSIIS for our registry and management of our VFC vaccines.

Cribs for Kids

We were fortunate to once again be awarded the Cribs for Kids grant in 2020. Through this grant, we were able to provide 30 families with a safe sleep environment for infant's birth to one year of age. Reducing infant mortality is a goal in Ohio and in our county. By providing a safe sleep environment to families in need, our department is contributing to help achieve this goal. When families receive a cribette from our department, staff spends time educating them on the ABC's of proper sleep – Sleeping Alone, Sleeping on their Back, Sleeping in their Crib!

Bureau for Children with Medical Handicaps

Our Children with Medical Handicaps (CMH) program currently has 84 clients, which is up slightly from the previous year. This program links families of children with special health care needs to a network of quality providers and helps families obtain payment for the services their child needs. Our Public Health Nurse has made adaptations and done many virtual visit with these clients during COVID to ensure they are able to stay actively enrolled in this program and receive the care and equipment they need. The Public Health Nurse provides a Letter of Approval for Treatment, Diagnostic, and Service Coordination for families. The PHN is the patient advocate to assist with financial help with medical necessities.

Flu Clinic Outreach

This was a great year for our flu outreach clinics. We visited 12 offsite clinics, including work sites, churches, and schools. It was also the first year we held two flu drive-thru clinics. These clinics were put on at the Fort Steuben Mall and downtown Steubenville on North and 5th Streets. Both drive-thru clinics were very well received by the community. This was an excellent opportunity for our department to prepare for mass immunization clinics when COVID-19 vaccines become more readily available for the general population.

Communicable Diseases

The health department continues our efforts to provide patients with effective treatment and support for sexually transmitted infection (STI). As a result of COVID-19, our educational efforts and screenings were not as robust as in past years. However, the department continued to screen and offer free condoms in efforts to decrease STI cases in the county.

In February, Valentine's Day was recognized by the health department as part of our efforts to stop the spread of the most common communicable diseases. The nursing division put together "condom bouquets". Each bouquet had 4-5 condoms with instructions on how to properly use them. In addition, information promoting our free testing for HIV, Hepatitis C and other STI's was included. These were given out to local bars, Family Recovery, and the Urban Mission to promote safe sex. The goal was to help reduce the spread of chlamydia and gonorrhea, two of the most prevalent and preventable communicable diseases.

COMMUNITY OUTREACH

COVID-19 caused many disruptions on outreach activities, but our department was able to hold a few events to educate and promote healthy lifestyles to the community.

Healthy Lifestyles

In January, Hannah Piko, Director of Nursing, spoke to over 50 preschoolers at Pugliese West Elementary on Healthy Lifestyles, including healthy eating habits, drinking water, washing hands, and proper dental hygiene.

Put A Lid on It

In August, we held a COVID-19 safe Bike Rodeo Event to promote our "Put a Lid on It" event for school aged children. We partnered with Apollo Pro Cleaning and Restoration for this event. They donated scooters and skateboards to raffle off to children who were in attendance. This event taught children about helmet safety when riding a bike, scooter or skateboard. Children were fitted properly for a helmet and able to practice on a scooter with their new helmet. Education materials were provided to each child with their helmet. We distributed nearly 50 helmets to children in the county and over 20 received a scooter or a skateboard from their raffle entry.

Virtual Field Trip

In October the Director of Nursing participated in a virtual field trip for all Pugliese West Elementary Preschoolers. She spoke about what a health department does and talked with the kids about germs, washing hands and how to protect ourselves and others during COVID-19. Educating our school aged children on how prevent the spread of germs is an important topic during any year and especially during COVID-19. Children knowing proper hygiene and how to cover coughs will help decrease the spread of germs, COVID-19, and the flu. These good habits go a long way in keeping more kids in the classroom!
